Subject: RE: ES&T commentary

Great. I get it. I will make sure that our press release references, at the very least, your 2015 ES&T paper about novel PFASs in the Cape Fear.

I agree with Andy. We can send our pubs, but Emily is the conduit for comments.

Subject: ES&T commentary

Hi Andy and Mark,

I was second author on the PFAS commentary that came out in ES&T today (Mark, I think you peer-reviewed it along the way - <http://pubs.acs.org/doi/abs/10.1021/acs.est.6b04806>). ECU communications are going to try to popularize the article through their press contacts in the state and were wondering if you could be contacted for a quote in response to the article as well as be mentioned in our press release about PFAS research in the state. You two really started PFAS work in the state and I think it would be almost irresponsible not to mention your research efforts when talking about these compounds in NC.

Could someone from our press office contact one or both of you?

Thanks.

Jamie
